## CPCTC and Triangle Proofs Homework

In each figure: (a) Name two triangles that are congruent
(b) State the reason why the triangles are congruent
(c) Name three additional pairs of parts that are congruent because of CPCTC
1.

3.

5. Given: $\overline{C A} \cong \overline{C B}$, and $D$ is the midpoint of $\overline{A B}$

Prove: $\angle A C D \cong \angle B C D$

| Statements | Reasons |
